

Wu-Wo Unpacking Order

Before you begin, ensure there is tea in your brewing pot and hot water in your thermos.

Lay out items in the following order:

1. **Mat** (ground cloth), lay out gently, please don't flap it. Place print toward the back.
2. **Pad**, place the print toward the front. Then remove shoes and kneel on pad to finish unpacking. Bag should be at your right side and off the mat.
3. **Tea tray** on front right edge of mat. If you are using **coasters**, place them from right to left at the left front edge.
4. **Thermos** off the left side of mat next to your thigh. If surface is unstable, lay thermos on its side.
5. **Tea towel** (folded with timer inside) in front of thermos.
6. Bundle with **brewing pot** and two cups in front of tea towel.
7. Bundle with **servicing pot** and two cups in front of brewing pot bundle.
8. Pause. Place **brewing mat** centered in front of you. If using a wrap, place it as a brewing mat in step twelve.
9. Bring **servicing pot bundle** in front of you and **unwrap** pot and cups, placing them on your tray.
10. Place **cups** on front of tray (farthest away from you) and pot on back of tray.
11. **Fold cup covers** in wrap and place back in your bag.
12. Bring **brewing pot bundle** in front of you and **unwrap**. Place the two cups on the tray and turn the wrap to make it square if you are using it as your brewing mat.
13. **Return the two cup covers** to the bag. If using a separate brew mat, fold cup covers in wrap and return them to bag.
14. Place **brew pot on left** of mat and **servicing pot** on right, spouts facing to the left.
15. Bring folded tea towel and place on the brewing mat with open end toward yourself behind the two pots. Timer can be removed from tea towel and placed to right of mat.

Pack in reverse:

- Wrap brewing pot and two cups, tight and neat, place in front of thermos.
- Wrap servicing pot and two cups, place in front of brewing pot.
- Place both bundles in bag, adjusting so that your brewing pot is sitting flat.
- Place towel and thermos in bag.
- Place coasters and tray in bag.
- Fold pad and place in bag.
- Pick up mat from the center edges, keeping the side that was touching the ground folded onto itself. No flapping!

Note: Adjustments can be made to accommodate those who brew using an elevated tray.
